"Simplifying complex/large area search procedures"

This comprehensive hands-on program will focus on firefighters searching for life, fire or downed firefighter(s) in a complex/large area occupancy. Firefighters must have a search procedure in place allowing them to simplify this low frequency, extremely high risk event. With the use of a thermal imager and search line, firefighters will be able to search complex/large area occupancies safer, quicker and more effectively.

March 15 and 16, 2008 at 08:00 hours

**at the Niles (MI) Fire Department
 1345 E. Main St. Niles, MI 49120**

The lead instructor...

Tony Tricarico, Captain at FDNY's Squad 252, is a nationally acclaimed instructor with over 30 years of experience, working in some of New York City's busiest companies. Captain "Trix" will show you the "down and dirty" of how it is done.
